The Department of Integrative Biology invites applications from qualified individuals who are interested in teaching the following course:

**BIOL3261-1 Ornithology**

This course gives students a thorough understanding of the biology of birds, with an emphasis on avian ecology, evolution, and behaviour. This course complements Ecology, Evolution, Physiology, Animal Behaviour, and Conservation. Classroom lectures are integrated with laboratory exercises which provide students with hands-on exposure to the topics covered. Students will learn to identify the common birds in the Windsor area. All students are required to participate in a full-day laboratory at Point Pelee and Holiday Beach on a weekend in late September or early October. (Prerequisite: BIOL2101.)

**Term**

September 2020 - December 2020

**Qualifications**

The successful candidate must hold a Master's degree by the date of appointment, a Ph.D. degree is preferred.

Applications are to be submitted on or before **June 2nd, 2020 by 3:00 pm** to martha@uwindsor.ca

As required by the Collective Agreement, the Department of Biology is hereby calling for applications from members of the Faculty Association who are suitably qualified and interested in teaching the above-mentioned course for the Fall 2020 semester.

Applicants who have not previously taught courses by the Biology Department are asked to submit a full C.V. Please email your C.V. etc. to martha@uwindsor.ca

Applicants from outside the University of Windsor will be expected to provide three letters of reference. The appointment to this position is subject to final budgetary approval.

*Please be aware that this course posting will require the course to be offered using alternative learning technology in an online environment. To learn about what resources are available to learn about and use these technologies please contact the Office of Open Learning or the Centre for Teaching and Learning.*
